SOFTWARE QUALITY ASSURANCE

Hallo, My name is Jecky Saputra, and I have been working for seven years of experience in Software Quality Assurance. As a dedicated Software Quality Assurance professional, I am driven by a passion for ensuring that every line of code not only meets but exceeds the highest standards of quality. My meticulous attention to detail allows me to spot potential issues before they reach the end-user, safeguarding the integrity and reliability of the software. With a strong analytical mindset, I approach every project with a methodical strategy, ensuring that all functionalities are thoroughly tested and all possible scenarios are accounted for. I believe in consistent communication and collaboration with developers to ensure that any issues are addressed promptly and effectively.

PROFESSIONAL EXPERIENCE

Accord Inovations at PT Bank Danamon Indonesia Software
Quality Assurance Lead - Banking / Core System
Tester Lead for Project MTL (Migration to Linux) – 6 Months

January 2026 - Present

- Led end-to-end testing for banking systems (SIT, UAT, regression) testing for core banking and digital banking systems
- Defined and executed test strategy, test plan, and test scenarios aligned with business requirements and risk assessment
- Managed and mentored QA team to ensure high-quality deliverables and timely project execution
- Collaborated with Product Owner, Business Analyst, Developer, and Risk/Compliance teams for requirement validation and defect resolution
- Ensured system compliance with regulatory requirements (OJK / POJK) and supported HTRO (Operational Risk Review) processes
- Performed defect management lifecycle (identification, tracking, prioritization, and closure) using tools (e.g., JIRA / ALM)
- Conducted review of test cases, test execution results, and QA documentation to maintain testing quality standards
- Supported release management and provided QA sign-off before production deployment

Achievement

- Improved defect detection rate through enhanced test coverage and strategy
- Reduced production defects via strict QA governance and regression testing
- Led QA team for projects MTL (Migration to Linux) NCBS + POJK across banking systems and digital platforms
- Ensured 100% compliance with regulatory requirements (POJK) during system implementation
- Accelerated testing cycle by 50% through process improvement / automation

Satkomindo Mediyasa at PT Bank Rakyat Indonesia
Software Quality Assurance - Middleware QA
Tester – 2 years | Tester Lead – 3 years

January 2020 - 2025

- Grooming / Sprint Planning, As QA Middleware I follow every Agile Sprint Planning activity on all applications in BRI which are SDLC (Agile), to ensure that the incoming load testing does not exceed the capacity and capabilities of a team. (*Tester Lead*)
- Responsible for the quality of all applications that are carried out in accordance with the specifications of the business requirement development document. (*Tester Lead and Tester*)
- Participate in every Design Code Review activity in order to understand the testing scope of a project before it is realized to the QA Team (*Tester Lead and Tester*).
- Create test scenarios based on the results of Code Review and Development Specification Documents, in order to match the User / Business Request Expectations (*Tester Lead*)
- Prepare the testing environment and check the Deployment SOP and completeness of documentation so that it does not become a failure when deploying to the QA / Production Environment (*Tester Lead*).
- Testing comprehensively, and ensuring every surrounding Front End, Middleware, Backend and doing End To End testing so that there is no Miss logic in the application (*Tester*)
- User Acceptance Test (UAT): Coordinate UAT readiness and schedule UAT activities so that they can be End to End when submitting testing results to the Product Owner. (*Tester*)
- Pre-Deployment, an activity that involves the Operations Team to prepare an application that will be deployed to the Production environment, where the QA team will present the deployment SOP and prepare test scenarios that are possible to be carried out in the production environment. (*Tester Lead and Tester*)
- Deployment, Oversee the Deployment activities of an application to Production and ensure Comprehensive Testing so that rollbacks and other problems do not occur during production. (*Tester Lead and Tester*)
- Piloting, supervise each Piloting activity and ensure all features are appropriate before Rollout of the application. (*Tester Lead and Tester*)

PT Mutual+ Global Resource at PT Bank Rakyat Indonesia
Software Quality Assurance - Front End QA

- Ensure that all visual elements of the web page function properly and have an interface that is easy for users to understand and use.
- Create test scenarios based on the results of Code Review and Development Specification Documents, in order to match the User / Business Request Expectations
- Conduct comprehensive testing at several points both functionally, Browser, UI / UX, Responsive, Security and Regression Testing.
- Compile detailed test result documentation, including bug reports, test scripts and fix lists, Organize and maintain test documentation for future reference.

PROFESSIONAL SKILLS

HARD SKILL

- Functional testing, regression testing dan smoke testing
- Unit testing, integration testing, system testing, dan acceptance testing.
- Automated Testing (*Katalon, Jmeter*)
- Manual Testing
- API Testing (*Postman, SoapUI*)
- Database
- Performance Testing (*Jmeter*)
- Test Management Tools (*Jira dan Confluence*)
- AS400
- Enterprise Service Bus (*ESB*)
- apiGateway
- NCBS
- And many more
- Core Banking / Financial System knowledge

SOFT SKILL

- Analytical Thinking
- Problem-Solving
- Detail-Oriented
- Communication
- Collaboration and Teamwork
- Time Management
- Adaptability
- Continuous Learning
- Empathy
- Client-Oriented Mindset
- Assertiveness
- Stress Management
- Test Case & Test Execution Report
- Test Strategy & Test Plan

EDUCATIONS

Sekolah Tinggi Manajemen Informatika dan Komputer
STMIK Indonesia Padang
Bachelor of Sistem Information

2013 - 2017
GPA 3.21 / 4.00

CERTIFICATIONS AND ACHIEVEMENT

- [webMethods Integration Essentials](#)
- [DevOps Test Engineer](#)
- [BSDP IT Specialist DevSecOps](#)
- [ISO 9001:2015 Awareness](#)
- [ISO 29119 Awareness](#)
- [Best Employee Of The Year 2022](#)
